

Lifelong Learning Programme

LESSON PLAN

School: Hasan Hüseyin Akdede Anatolian Teacher Training High School

Teacher: Fazilet Turna

Subject: Chemistry

Topic: Chemical Formulas

Class: 10th

Objectives:

Students are going to match the names of the laws with the formulas reviewed at 10th grade

Progress:

Introduction

Students are going to review the topics of the 10th grade

Motivation

The teacher is going to ask the important laws of gas and the structure of Atom

1. All of the formulas related with the gases are written on the board.

2. The formulas related with the models of the Atom are written on the board

Evaluation

The software related with the Chemistry formulas is used to reinforce the topic. The formulas related with the chemistry are matched with their names.
