

INSTRUCTIONS ON HOW TO USE IT:

This Excel game is to be used as a sort of quiz game in Chemistry and Geology. The file contains two Excel sheets (bottom left of the screen), one for each subject. The user (student) will see several pictures related to these subjects, and in the box underneath he/she will write the word which describes the picture. If it is correct, it will be so announced with a green background. If not, it will be red and the user will be asked to try again.
