om.java

```
1 package g;
2
3 public class om {
4     int x;
5     public int getX()
6     {
7         return this.x;
8     }
9     public void setX(int value)
10    {
11        this.x=value;
12    }
13    public om()
14    {
15        this.x=5;
16    }
17 }
```

t.java

```
1 package g;
2
3 public class t {
4
5     public static void main(String[] args) {
6         // TODO Auto-generated method stub
7         stud s=new stud();
8         System.out.println(s.getX()+" si "+s.getY());
9     }
10 }
11
12 }
```

stud.java

```
1 package g;
2
3 public class stud extends om {
4     int y;
5     public stud ()
6     {
7         super();
8         y=7;
9     }
10    public int getY()
11    {
12        return this.y;
13    }
14    public void setY(int value)
15    {
16        this.y=value;
17    }
18 }
```
